### FTEs per 1,000 Residents

Annual Estimates of the Resident Population: July 1, 2014  
Source: U.S. Census Bureau, Population Division

9,614 Licensed Practical Nurses (LPNs) voluntarily took part in the 2016 Licensed Practical Nurse Workforce Survey. The Virginia Department of Health Professions' Healthcare Workforce Data Center (HWDC) administers the survey during the license renewal process, which takes place during a two-year renewal cycle on the birth month of each respondent. Therefore, only approximately half of all LPNs have access to the survey in any given year. Thus, these survey respondents represent only 31% of the 31,102 LPNs who are licensed in the state but 74% of renewing practitioners.

The HWDC estimates that 28,315 LPNs participated in Virginia's workforce during the survey period, which is defined as those who worked at least a portion of the year in the state or who live in the state and intend to return to work as an LPN at some point in the future. Between October 2015 and September 2016, Virginia's LPN workforce provided 25,219 "full-time equivalency units", which the HWDC defines simply as working 2,000 hours a year (or 40 hours per week for 50 weeks with 2 weeks off).

95% of all LPNs are female, including 96% of those LPNs who are under the age of 40. In a random encounter between two LPNs, there is a 52% chance that they would be of different races or ethnicities, a measure known as the diversity index. This makes Virginia's LPN workforce just slightly less diverse than the state's overall population, where there is a 55% chance that two randomly chosen people would be of different races or ethnicities. Among LPNs who are under the age of 40, the workforce is actually slightly more diverse than the overall population with a diversity index of 57%.

48% of all LPNs grew up in a rural area, and 32% of these professionals currently work in non-Metro areas of the state. Overall, 19% of all LPNs work in a non-Metro area of the state. Meanwhile, 70% of Virginia's LPNs graduated from high school in Virginia, and 86% earned their initial professional degree in the state. In total, 87% of Virginia's LPN workforce has some educational background in the state.

97% of all LPNs hold a LPN/LVM diploma or certificate as their highest professional degree, while most remaining LPNs have gone on to pursue an Associate degree in Nursing. 41% of Virginia's LPN workforce currently has educational debt, including 61% of those under the age of 40. The median debt burden for those LPNs with educational debt is between \$20,000 and \$30,000.

88% of LPNs are currently employed in the profession. 68% of all LPNs hold one full-time position at the moment, while 12% currently hold two or more positions simultaneously. 55% of Virginia's LPNs work between 40 and 49 hours per week, while just 5% of LPNs work at least 60 hours per week. Although 9% of LPNs have switched jobs at some point in the past year, another 56% of LPNs have remained at their current position for more than two years.

The median annual income for LPNs is between \$30,000 and \$40,000. In addition, three-quarters of wage or salaried LPNs receive at least one employer-sponsored benefit, including 57% who receive health insurance. 94% of LPNs are satisfied with their current employment situation, including 63% who indicate they are "very satisfied".

25% of Virginia's LPNs have worked at two or more locations in the past year, while 22% of LPNs currently do so. 82% of LPNs work in the private sector, including 62% who work at a for-profit institution. In fact, more than one-quarter of all LPNs work at a long-term care facility or nursing home, the most of any establishment type in the state.

A typical LPN spends nearly all of her time treating patients. In fact, 68% of LPNs serve a patient care role, meaning that at least 60% of their time is spent in patient care activities. Meanwhile, a typical LPN spends approximately 45% of her time treating the elderly and 35% of her time treating adult patients.

34% of LPNs expect to retire by the age of 65. 6% of the current workforce expects to retire in the next two years, while half the current workforce expects to retire by 2041. Over the next two years, 33% of all LPNs expected to pursue additional educational opportunities, while 10% plan on increasing their patient care hours.

**A Closer Look:**

Licensees

## Definitions

- 1. Virginia's Workforce:** A licensee with a primary or secondary work site in Virginia at any time during the survey timeframe or who indicated intent to return to Virginia's workforce at any point in the future.
- 2. Full Time Equivalency Unit (FTE):** The HWDC uses 2,000 (40 hours for 50 weeks) as its baseline measure for FTEs.
- 3. Licensees in VA Workforce:** The proportion of licensees in Virginia's Workforce.
- 4. Licensees per FTE:** An indication of the number of licensees needed to create 1 FTE. Higher numbers indicate lower licensee participation.
- 5. Workers per FTE:** An indication of the number of workers in Virginia's workforce needed to create 1 FTE. Higher numbers indicate lower utilization of available workers.
