How to Utilize NarxCare

**FEATURES**

- Scores reflect past exposure to opioids, sedatives, stimulants.
- Scores help differentiate those patients with low to high exposure based on multiple prescribers, pharmacies and overlaps.

**NarxScores and Risk Indicators**

<table>
<thead>
<tr>
<th>Narx Scores</th>
<th>Overdose Risk Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Narcotic</td>
<td>Sedative</td>
</tr>
<tr>
<td>504</td>
<td>371</td>
</tr>
</tbody>
</table>

3rd digit = number of current dispensations

**SCORE RANGE**

- 0-199: Low exposure, low risk
- 200-499: Moderate complexity
- >500: Multiple prescribers, pharmacies, overlaps

**PATIENT POPULATION**

- 75%
- 20%
- 5%

**STATE CLINICAL ALERTS**

1. Overlapping Opioid & Benzodiazepine
2. Below Daily Active MME Threshold
3. Below Prescriber & Dispensary Threshold

**BENEFITS**

- Shows number of current prescriptions dispensed.
- Provides essential clinical alerts in the prescriber workflow.
- Notifies prescribers when further investigation may be warranted.

**NarxCare PDMP Report: Dynamic Graphical Display of Dispensation History**

- Filter-able display of controlled substance history.
- Two-year timeline view by drug category and provider.
- Click chart for specific Rx details.

**Treatment Intensity**

- Total Morphine Milligram Equivalents (MME) and Lorazepam Milligram Equivalents (LME) by day over a two-year timeline.

**Current and 30-Day Average**

- Summary table of current and 30-day average.

**Comparison between current MME and 30-day MME/day average.**
