Opioid CE Letter & Package

In 2016, the General Assembly passed law that authorizes the Board of Medicine to require 2 hours of continuing education on controlled substances each biennium. The Board is to notify licensees prior to January 1st of each odd-numbered year that they are required to obtain the 2 hours in the next biennium.

For the first biennium, 2017-2018, all Board of Medicine licensees with prescriptive authority were required to obtain any 2 hours of continuing education related to pain management, the responsible prescribing of controlled substances, and the diagnosis and management of addiction.

Some physicians asked the Board to develop a 2-hour course for their convenience. What the Board did in early 2017, in concert with the Medical Society of Virginia, was to post on the Board's website a list of free, online courses developed by professional societies, universities, and government agencies.

Since the opioid regulations became effective in March 2017, the Board has recognized 2 significant issues. The first is that not all practitioners with prescriptive authority have read the regulations and understand them. The second is that some practitioners, having made the decision to reduce a patient's opioid, do not always taper in an effective way. So in response to these 2 issues, the Board endorses a 2-hour "package" of continuing education for its prescribing licensees. These 2 hours qualify as Type 1 continuing education for the purpose of renewal.

The 2 hours can be met by:

- Reading the Board of Medicine Regulations Governing Prescribing Opioids and Buprenorphine https://www.dhp.virginia.gov/medicine/leg/Medicine_Opioid_Regs_08_082018.doc
- Reading the Board's Frequently Asked Questions on Opioids and Buprenorphine <https://www.dhp.virginia.gov/medicine/docs/FAQPrescribingBuprenorphine.pdf>
- Viewing the Prescription Monitoring Program 7-minute video on NarxCare <https://app.brainshark.com/appriss/NarxCareNavigation?nodesktopflash=1>
- Taking the Stanford University course on "How to Taper Patients Off of Chronic Opioid Therapy" (1.25 hours CAT I) <https://med.stanford.edu/cme/courses/online/opioid-taper.html>

This "package" will be on the Board of Medicine website at <https://www.dhp.virginia.gov/medicine/> under Controlled Substances CE Requirements. Or if you so choose, you may obtain any other 2 hours as long as they relate to pain management, the responsible prescribing of controlled substances, and the diagnosis and management of addiction.

I hope this is helpful to you for 2019-2020.

With kindest regards,

William L. Harp, MD
Executive Director
Virginia Board of Medicine

Licensure by Endorsement

Since the Board of Medicine has not yet joined the Interstate Medical Licensure Compact, it has developed a pathway to licensure through endorsement. It is designed for those applicants that do not have adverse information in their background. All physicians that wish to seek a license through endorsement are ADVISED TO READ THE INSTRUCTIONS FIRST to be clear that you qualify to apply through this pathway.

https://www.license.dhp.virginia.gov/apply/Forms/Medicine/MD_DO_End_instruct.pdf

Nurse Practitioner Autonomous Practice

The Boards of Nursing and Medicine have developed regulations pursuant to the 2018 legislation that create a pathway to autonomous practice for nurse practitioners. The links to the law, the regulations (effective January 7, 2019) and the application are included here.

DMAS Evidence-Based Practices for MAT

TO: All Addiction and Recovery Treatment Services (ARTS) Providers, Prescribers, Managed Care Organizations (MCOs) and Magellan of Virginia Participating in the Virginia Medical Assistance Program

FROM: Jennifer S. Lee, M.D., Director
Department of Medical Assistance Services (DMAS)

DATE: 2/11/19

SUBJECT: Evidence-Based Practices and Medication Assisted Treatment for Opioid Use Disorder

The purpose of this bulletin is to highlight evidence-based practices for the treatment of Opioid Use Disorder (OUD) and coverage of these services by the Medicaid Addiction and Recovery Treatment Services (ARTS) program and to invite providers to a webinar on February 14, 2019. ARTS aligns coverage with the current evidence to provide the best outcomes for Medicaid members with an OUD, emphasizes the importance of providing care that is responsive to individual patient preferences, needs and values, and supports Medicaid providers to effectively

address the needs of members with OUD. DMAS' goals are to minimize treatment barriers for members who have an OUD while ensuring these members obtain access to high quality Medication Assisted Treatment (MAT) and other proven therapies.

ARTS Alignment with Evidence-Based Practices

Below is a summary of the current evidenceⁱ and coverage through the ARTS benefit. Nothing in this summary is intended to eliminate the need to follow the Virginia Board of Medicine (BOM) regulations concerning the prescribing of buprenorphine for addiction treatment.

- DMAS supports **same day access and initiation of pharmacotherapy** for individuals with OUD presenting to any American Society of Addiction Medicine (ASAM) level of care.
- **Maintenance pharmacotherapy should be prescribed based on the individual's treatment needs**, without arbitrary tapering or time limits.
- **No prior authorization is required for the preferred buprenorphine/naloxone product, Suboxone films**, prescribed by in-network buprenorphine waived practitioners who are credentialed and contracted with the Medicaid Managed Care Organizations (MCOs) for managed care enrolled members or DMAS enrolled buprenorphine-waivered practitioners for fee-for-service members. Evidence exists that **some individuals may benefit from buprenorphine doses greater than 16 milligrams per day** through higher rates of treatment retention and abstinence from illicit substancesⁱⁱ. Therefore, DMAS does not require prior authorization for doses up to 24 milligrams per day of Suboxone films for in-network practitioners.
- Providers shall continue to follow the BOM guidelines regarding dosing during the induction phase as well as maximum prescribing dosages. Please note that the BOM requires documentation in the member's record to support prescribed doses of greater than 16 milligrams per dayⁱⁱⁱ.
- Non-preferred buprenorphine products such as the buprenorphine monoprodut and buprenorphine/naloxone tablets continue to require a prior authorization by DMAS/Magellan Pharmacy Benefit Manager (PBM) and the Medicaid MCOs.
- Diversion and misuse of buprenorphine/naloxone may still occur but is relatively rare in comparison to diversion and misuse of prescription opioid pain medications. The most commonly cited reason is to manage the negative side effects of opioid withdrawal.
- Members who receive a **prescription for buprenorphine products are no longer automatically "locked-in" to a prescriber or group of prescribers**. However, if there are identified patient safety concerns, a "lock-in" may still be instituted. Prescribers are still required to be credentialed and contracted with the Medicaid MCO for their members and enrolled with DMAS for fee-for-service members, for the prescriptions for opioid treatment to be covered by Medicaid. Prescription coverage will continue to be denied when prescribed by out-of-network practitioners.
- DMAS requires the **co-prescribing of the overdose reversal agent naloxone with buprenorphine containing products** since individuals with OUD are at elevated risk for overdose. When possible, family members and significant others should also be trained in the use of naloxone. DMAS/Magellan PBM and the Medicaid MCOs **cover naloxone at no cost to the member**.

- DMAS supports the **integration of medical services with addiction services including clinically indicated infectious disease testing** such as HIV, Hepatitis A/B/C, syphilis, and tuberculosis testing for members with OUD at initiation of and as indicated during treatment. DMAS also covers Hepatitis C treatment and HIV treatment and prevention including pre-exposure prophylaxis. **Hepatitis C treatment is covered** for all Medicaid members with any fibrosis score. Primary care providers can prescribe preferred drugs such as Mavyret (glecaprevir/pibrentasvir) without a referral to a specialist. Members should not be denied treatment for Hepatitis C for the sole reason of Substance Use Disorder. Please see the DMAS Preferred Drug List for more information: <https://www.virginiamedicaidpharmacyservices.com/provider/preferred-drug-list>
- DMAS supports **integration of reproductive health services including contraception with addiction treatment**. DMAS and the Medicaid MCOs cover all family planning medications and devices including long acting reversible contraception (LARC) without a prior authorization.
- DMAS follows the BOM regulations, which **requires members to be assessed and referred for substance use disorder counseling and/or psychotherapy**. However, current evidence on the value of requiring counseling and/or psychotherapy with opioid use disorder is mixed, and some members may benefit more than others^{iv}. During the course of their treatment, some members may be unable or unwilling to engage in counseling and/or psychotherapy. For these individuals, it is essential that they remain on pharmacotherapy, since pharmacotherapy alone can reduce the risk of mortality from OUD by as much as 60 percent. Therefore, **DMAS does not require members to accept ongoing counseling and/or psychotherapy as a condition of receiving pharmacotherapy**. If counseling and/or psychotherapy is discontinued, the reasons should be documented in the member's medical record.
- DMAS **allows and encourages same-day billing of medical and behavioral health services** (i.e., if an obstetrician is providing prenatal care and addiction care in the same visit, these are both covered) to support integrated medical services and addiction services. **Providers should contact the Medicaid MCOs to determine the appropriate modifier to place on claims (such as "GB" or "25")** which defines the services as separate and distinct from each other to support billing. The MCO provider contact numbers are located on the back of the member's MCO ID card. For members enrolled in fee-for-service, Magellan of Virginia will continue to cover MAT. The medical visit not related to the OUD would be billed to DMAS directly. Please visit the ARTS Reimbursement Chart for specific details of what Magellan of Virginia covers for fee-for-service members: <http://www.dmas.virginia.gov/#/arts>.
- DMAS **supports home induction on buprenorphine products** in accordance with the ASAM National Practice Guideline.
- Relapse to opioid use is a common occurrence among individuals with OUD. DMAS **encourages providers to use urine drug testing as a therapeutic tool and not to discharge patients based on relapse and/or positive drug test results**. Upon discovering relapse, providers should re-assess a patient's condition, their adherence, their dose of pharmacotherapy and behavioral treatment, and consider intensification of care.
- DMAS requires Medicaid providers for ARTS Intensive Outpatient Programs (IOPs), Partial Hospitalization Programs (PHPs) and Residential Treatment Services (RTS) to ensure that Medicaid and FAMIS enrolled members with OUD **admitted to any of these**

programs be evaluated for and have access to evidence-based MAT, including buprenorphine.

- The introduction of **pharmacotherapy for OUD prior to and immediately after release from institutional settings**, such as hospitals, inpatient rehabilitation facilities, and jails, can reduce the elevated risk of fatal overdose related to loss of tolerance^v.
- DMAS is updating the *Preferred Office-Based Opioid Treatment (OBOT) Credentialing checklist* to align with these evidence-based practices, as well as the *Preferred OBOT Model of Care and Attestation* form. This form will be required for new Preferred-OBOT applicants effective March 1, 2019. Instructions for applying for Preferred OBOT status may be found online at: <http://www.dmas.virginia.gov/#/artscredentialing> under “Office Based Opioid Treatment.”

February 14, 2019 Webinar: Evidence-Based Practices for Treatment of Opioid Use Disorder and ARTS Coverage

DMAS is facilitating a webinar on February 14, 2019 from 12:00 p.m. – 1:30 p.m., for all ARTS Preferred OBOT Providers and other MAT providers to review these evidence-based practices and ARTS coverage. The expert presenter is Dr. Mishka Terplan, MD, MPH, FACOG, DFASAM, Professor in Obstetrics and Gynecology and Psychiatry, Associate Director in Addiction Medicine at Virginia Commonwealth University, and Addiction Medicine Consultant with DMAS.

[Click Here to Register](#)

After your request has been approved, you will receive instructions for joining the meeting. If you already registered for this meeting, you do not need to register again.

For additional questions about this bulletin or the ARTS benefit, please email:
SUD@dmas.virginia.gov or call (804) 593-2453.

Medicaid Expansion

New adult coverage begins January 1, 2019. Providers will use the same web portal and enrollment verification processes in place today to verify Medicaid expansion coverage. In ARS, individuals eligible in the Medicaid expansion covered group will be shown as “MEDICAID EXP.” If the individual is enrolled in managed care, the “MEDICAID EXP” segment will be shown as well as the managed care segment, “MED4” (Medallion 4.0), or “CCCP” (CCC Plus). Additional Medicaid expansion resources for providers can be found on the DMAS Medicaid Expansion webpage at: <http://www.dmas.virginia.gov/#/medex>.

Quick Notes

Radiation Therapists and Nuclear Medicine Techs

The Board of Medicine licenses individuals that administer ionizing radiation. This includes radiation therapists and nuclear medicine technologists along with radiographers involved in specialized studies including bone densitometry, mammography, CT, interventional cardiac, interventional cardiovascular, and interventional vascular studies. Performance of MRI and ultrasound do not require licensure as a radiologic technologist. As many of you are aware, if you are an employee of a hospital, you are exempt from licensure as a rad tech. If you practice in a clinic, office, urgent care or other facility, even those within a healthcare system, you need a license if the location does not have licensure as a hospital with the Virginia Department of Health. At some point in the future, the Board will begin to acknowledge unlicensed practice with Consent Orders for all applicants that have been practicing in the specialties listed above, except for those that have exclusively practiced as an employee of a hospital.

Clarification of “store and forward” in Guidance Document 85-12 on Telemedicine

Although the term “store-and-forward technologies” is not defined by statute, it is defined by regulation of the Virginia Department of Health for the purpose of Medicare and Medicaid covered services, as: “store and forward” means when prerecorded images, such as x-rays, video clips, and photographs are captured and then forwarded to and retrieved, viewed and assessed by a provider at a later time. Some common applications include (i) teledermatology, where digital pictures of a skin problem are transmitted and assessed by a dermatologist (ii) teleradiology, where x-ray images are sent to and read by a radiologist; and (iii) teleretinal imaging, where images are sent to and evaluated by an ophthalmologist to assess for diabetic retinopathy.” 12VAC 30-121-70(7)(a).

Pharmacotherapy for Weight Loss by Physician Assistants and Nurse Practitioners

If specifically authorized in the practice agreement with a supervising or collaborating patient care team physician, a physician assistant or nurse practitioner may perform the physical examination, review tests, and prescribe Schedules III through VI controlled substances for the treatment of obesity. See <https://law.lis.virginia.gov/admincode/title18/agency85/chapter20/section90/> for details.

Passage of USMLE and COMLEX

A number of years ago, the Board passed regulation to ensure the competency of physicians that took more than 10 years to pass USMLE or COMLEX by requiring specialty board certification with ABMS or BOS-AOA. If you anticipate hiring a physician that took more than 10 years to pass the exams, you should check for board certification to avoid disappointment for the prospective physician and you.

Type 2 CE/CAT II CE Hours

Teaching students, residents, fellows in your field qualifies for Type 2/CAT II continuing education that counts towards the Board's renewal requirements.

United Virginia Chiropractic Association (UVCA) Continuing Education

The Board has approved continuing education courses developed and presented by the UVCA as Type 1 for the purpose of license renewal.

Surgical Assistants-New Regulation

A surgical assistant who was registered based on a credential as a surgical assistant or surgical first assistant issued by the National Board of Surgical Technology and Surgical Assisting, the National Surgical Assistant Association, or the National Commission for the Certification of Surgical Assistants or their successors shall attest that the credential is current at the time of renewal.

Electronic Renewal Notices

In the near future, perhaps for the 2020 renewal cycle, notices will be sent electronically. It is important that your e-mail address is on file with the Board of Medicine.

Paperless Licenses

The Department of Health Professions has been working on going paperless with its licenses. In a future renewal, you will receive a hard copy with the information that it will be the last paper copy you receive. The Department of Health Professions License Lookup will be available to third parties that need to verify your current licensure status in a primary source-verified manner. More information will be provided in future newsletters.

VA PMP AWARE

Virginia's PMP is very pleased to announce that for the first time in any state, information related to the prescribing and dispensing of covered substances at the Department of Defense Military Treatment Facilities in Virginia, nationwide and overseas is now available through the Virginia PMP. The data available is retroactive to December 20, 2019 and is accessed in the same way as you would request prescription information from another state's PMP currently. If you wish to set a default so this information is queried for every request, simply log on to PMP AWARe and modify your preferred jurisdictions to include Military Health Systems. If you do not wish to have this as a default, you may simply check the appropriate box while submitting a patient request when desired. This is just one more important enhancement in assisting you in providing the best care for all Virginians.
