Subject: Pharmacy Working Conditions – Guidance and Well-Being Assessment

Virginia Department of
Health Professions

Board of Pharmacy

The Virginia Board of Pharmacy remains concerned about pharmacy working conditions that have been exacerbated by the COVID-19 pandemic and other public health crises, and recognizes that pharmacists, pharmacy technicians, and pharmacy interns have experienced increased demands on their skills and time to provide patient care.

Please review important information in [Guidance Document 110-26](#) entitled [Pharmacy Working Conditions](#) which became effective May 12, 2022.

Additionally, you are encouraged to assess your well-being monthly by completing the American Pharmacists Association [Well-Being Index](#), invented by Mayo Clinic. The Well-Being Index provides Pharmacy Professionals with a way to anonymously assess their well-being and evaluate multiple dimensions of distress.

Thank you.

Virginia Board of Pharmacy
