Currently there are more than **52,000** prescribers and **12,000** pharmacists
registered to use PMP

WHAT DOES PMP DO?

PMP is authorized with specific powers and duties by the code of Virginia. PMP's mission is to promote the appropriate use of controlled substances for legitimate medical purposes while deterring the misuse, abuse and diversion of controlled substances.

The prescription monitoring program collects prescription data for Schedule II-IV drugs into a central database which can then be used by authorized users to assist in deterring the illegitimate use of prescription drugs.

AUTOMATIC REGISTRATION

As of January 2016, all newly licensed prescribers and pharmacists are automatically registered for the PMP.

NEW LEGISLATION

New legislation passed by the 2017 General Assembly increases requirements for using the Prescription Monitoring Program as well as requiring the reporting of dispensing of all gabapentin products.

CDC Guidelines

2016 CDC guidelines for opioid prescribing include: use of non-opioid therapies for chronic pain; and use of the lowest possible effective opioid dose.
