534 Assisted Living Facility Administrators voluntarily participated in this survey. Without their efforts the work of the center would not be possible. The Department of Health Professions, the Healthcare Workforce Data Center, and the Board of Long-Term Care Administrators express our sincerest appreciation for your ongoing cooperation.

Thank You!

The Virginia Department of Health Professions' Healthcare Workforce Data Center (HWDC) administered the 2018 Assisted Living Facility Administrator (ALFA) workforce survey in March 2018. 534 ALFAs responded to this survey, which represents 82% of the 653 ALFAs who are licensed in the state. In 2018, there were a total of 620 ALFAs in Virginia's workforce, and these professionals provided 751 "full-time equivalency units", which the HWDC defines as working 2,000 hours per year (or 40 hours per week for 50 weeks with two weeks off).

81% of all ALFAs are female, and the median age of the ALFA workforce is 52. In a random encounter between two ALFAs, there is a 41% chance that they would be of different races or ethnicities, a measure known as the diversity index. This makes Virginia's ALFA workforce less diverse than the state's overall population with its diversity index of 56%. 45% of all ALFAs grew up in a rural area during their childhood, and 26% of these professionals currently work in non-metro areas of the state. Overall, 17% of Virginia's ALFAs work in non-metro areas.

34% of all ALFAs hold a Baccalaureate degree as their highest overall degree. With respect to professional degrees specifically, 33% hold an Administrator-in-Training certificate as their highest degree. 28% of all ALFAs carry education debt, including 59% of those under the age of 40. For those ALFAs with education debt, the median debt burden is between \$20,000 and \$30,000.

90% of all ALFAs are currently employed in the profession, and 84% hold one full-time job. Meanwhile, 2% of ALFAs have been involuntarily unemployed at some point in the past year, and another 2% have been underemployed. The median annual income for ALFAs is between \$70,000 and \$80,000. In addition, 87% of ALFAs receive at least one employer-sponsored benefit, including 85% who receive paid vacation time. 95% of ALFAs are satisfied with their current employment situation, including 70% who are "very satisfied".

46% of all ALFAs work in either Hampton Roads or Northern Virginia. 80% work in the for-profit sector, and 70% are employed in assisted living facilities as their primary work location. The typical ALFA spends approximately half of her time on administrative tasks and treats between 50 and 74 patients at her primary work location. 27% of Virginia's ALFA workforce expect to retire in the next ten years, and one-half of the workforce expect to retire by 2038.

Summary of Trends

Although the number of licensed ALFAs has hardly increased since 2013 (653 vs. 642), the response rate among these licensees has increased significantly (82% vs. 68%). Meanwhile, the size of the ALFA workforce has increased by just 1% (620 vs. 612), and the number of FTEs provided by this workforce has increased by 3% (751 vs. 728).

While the percentage of females in the ALFA workforce has fallen over the past five years (81% vs. 83%), the ALFA workforce has also seen an increase in its diversity index (41% vs 37%). Among ALFAs who are under the age of 40, the increase in the diversity index has been even more pronounced (50% vs. 41%). In addition, Virginia's ALFAs are less likely to have grown up in rural areas (45% vs. 49%), and those professionals are less likely to work in non-metro areas (26% vs. 33%). ALFAs are now more likely to hold an Administrator-in-Training certificate as their highest professional degree (33% vs. 24%). ALFAs are also more likely to hold a Baccalaureate degree as their highest overall degree (34% vs. 32%).

Since 2013, ALFAs have become less likely to be employed in the profession (90% vs. 93%). ALFAs are also less likely to work at their primary work location for at least two years (63% vs. 69%). Meanwhile, their median annual income has increased by \$10,000 since 2014, and more ALFAs earn at least \$100,000 per year (20% vs. 13%). Regardless, ALFAs are less likely to consider themselves "very satisfied" at their primary work location relative to 2013 (70% vs. 73%).

ALFAs have become less likely to be employed at an assisted living facility since 2015 (70% vs. 78%). Instead, they are more likely to work at continuing care retirement facilities (5% vs. 4%) and hospices (2% vs. 1%). Meanwhile, ALFAs have become more likely to serve an administrative role since 2013 (28% vs. 23%). ALFAs are also less likely to be planning to pursue additional educational opportunities (15% vs. 18%) or increase patient care hours (5% vs. 8%).

Definitions

- 1. Virginia's Workforce:** A licensee with a primary or secondary work site in Virginia at any time in the past year or who indicated intent to return to Virginia's workforce at any point in the future.
- 2. Full Time Equivalency Unit (FTE):** The HWDC uses 2,000 (40 hours for 50 weeks) as its baseline measure for FTEs.
- 3. Licensees in VA Workforce:** The proportion of licensees in Virginia's Workforce.
- 4. Licensees per FTE:** An indication of the number of licensees needed to create 1 FTE. Higher numbers indicate lower licensee participation.
- 5. Workers per FTE:** An indication of the number of workers in Virginia's workforce needed to create 1 FTE. Higher numbers indicate lower utilization of available workers.

This report uses weighting to estimate the figures in this report. Unless otherwise noted, figures refer to the Virginia Workforce only. For more information on HWDC's methodology visit: www.dhp.virginia.gov/hwdc
